of Correction

Sir:

In accordance with the provisions of 37 CFR § 1.322(b), the Patent Office is requested to correct numerous typographic errors in the above-identified patent. Since the nature of the mistakes which were made on the part of the Patent Office are such that a certificate of correction is inappropriate, Patentee, through its undersigned attorney of record, respectfully requests that the Commissioner of Patents issue a corrected patent in lieu of a certificate of correction.

The corrections to be made are of consequence to provide the proper recitation in the specification and abstract. Patentee filed a national phase transmittal on August 24, 2001 along with a substitute specification. However, the Patent Office printed the patent based on the English translation of the international application and not the substitute specification filed on August 24, 2001. Since these errors are printing errors of the Patent Office, such corrected patent

should be issued at no expense to the Patentee. Accordingly, issuance of a corrected patent in lieu of a certificate of correction is requested.

Respectfully submitted,
